
FITNESS-TO-DRIVE DRIVER OFF-ROAD ASSESSMENT

WHO CAN BENEFIT:

- Individuals who have cognitive, sensory, or musculoskeletal impairments secondary to stroke, traumatic brain injury, or progressive neurodegenerative conditions; or their family members
- Individuals who have concerns about their own driving skills, or those of a family member

THIS ASSESSMENT EXAMINES:

- The individual's ability to drive safely
- The individual's ability to pass an on-road driving assessment by a CDRS (certified driving rehabilitation specialist)
- The individual's chances of having his/her license revoked and losing independence

BENEFITS OF HAVING ACCESS PERFORM THIS ASSESSMENT:

We will evaluate the individual's physical, perceptual, cognitive, behavioral, and sensory driving-related skills and abilities, prior to taking an on-road assessment, and screen those individuals who may be unsafe to take an on-road assessment. This assessment allows us to:

- Understand the source of problems the individual may be having with driving
- Develop a plan of care which involves physical or occupational therapy, targeting areas that can be improved
- Allows for the appropriate referral to another discipline, e.g. hearing, vision, etc., if warranted
- We are conveniently located and accept most forms of insurance.

5 CONVENIENT
